Abstract (en)
[origin: WO2019229596A1] The invention concerns a mold for making a support element for the human body, such as for example a saddle for vehicles, for example for bicycles or motorcycles, a seat, a grip, a handle, an armrest, a backrest, a headrest, a sport or leisure equipment, and/or a base component and/or a component thereof, wherein the mold comprises a lower portion (12) in use, and a cavity, suitable for molding the base component, wherein the mold comprises an extraction system comprising movable rods (16b), suitable in use for releasing and/or lifting and/or escaping from the mold and/or from the lower portion (12) the molded base component, and further movable rods (16c), suitable in use to form undercuts and/or holes in the base component. The invention further concerns a support element for the human body made by means of the mold, and a corresponding production method.
