Abstract (en)  
[origin: WO2019233712A1] The invention relates to a window cleaning device, in particular for motor vehicles, comprising at least one wiper blade (14), at least one drive unit (16) for moving the wiper blade (14) along at least one window (18) of at least one motor vehicle, and at least one fluid output unit (20) for humidifying the window (18). According to the invention, the window cleaning device comprises a regulating and/or control unit (22) which controls and/or regulates the fluid output unit (20) in accordance with at least one movement friction value of the wiper blade (14) on the window (18).
