Abstract (en)

[origin: WO2019234242A1] The invention relates to a coupling system (29) for a rail vehicle, comprising a coupling (30) having a coupling housing (32), a contact carrier structure (34) attached to the coupling housing (32) and a plurality of contacts (54a, 54b, 56a, 56b, 58a, 58b, 60a, 60b), which are mounted on the contact carrier structure (34) and which each have one of a plurality of different functions. The contact carrier structure (34) can be assembled from multiple separate contact carrier inserts (44a, 44b, 46a, 46b, 48a, 48b, 50a, 50b). From the plurality of contacts (54a, 54b, 56a, 56b, 58a, 58b, 60a, 60b), only those that have the same function are mounted on each of the separate contact carrier inserts (44a, 44b, 46a, 46b, 48a, 48b, 50a, 50b).
