Abstract (en)  
[origin: CA3101043A1] The invention relates to a device for averting danger, comprising a main part (1) for attachment to a mobile communication device (6), said main part (1) at least partially surrounding the mobile communication device (6) and at least one active element (3) being arranged on the main part (1) and projecting from the main part (1) such that the active element (3) can be used as an impact amplifier.
