Abstract (en)

[origin: EP3579206A1] An enclosure for an alarm peripheral, having a base plate (4) arranged to be mounted to a mounting surface, and an actuator unit (10). The actuator unit (10) is arranged to be independently mounted to the mounting surface. Further, the enclosure (1) comprises an anti-tamper detection system comprising a first element (12) associated with the actuator unit (10) and a second element (17) associated with the base plate (4), such that when the enclosure (1) is mounted to the mounting surface, the anti-tamper detection system is arranged to detect a relative movement between the first and second elements.
