Abstract (en)

[origin: WO2019228678A1] The invention relates to a charging column for electric vehicles, comprising a charging column top and a charging column base and a support structure that extends through the charging column base. Said support structure has a fastening bracket in the lower region of the charging column base for fastening the support structure to a ground foundation, the charging column top being fastened to the support structure directly and the charging column base being fastened to the support structure via the charging column top.
