Abstract (en)
[origin: WO2019224000A1] The invention relates to a charging device (1) for charging a mobile electronic terminal (2), comprising a light-guide unit (4) providing a contact surface (3) for the mobile electronic terminal (2), by means of which light can be guided and decoupled in the direction of the contact surface (3), and comprising a charging unit (7) arranged behind the light-guide unit (4) on a side opposite the contact surface (3), by means of which the mobile electronic terminal (2) can be contactlessly charged.
