Abstract (en)
[origin: EP3804558A1] An embodiment of the present invention provides a cosmetic container. The cosmetic container includes a cosmetic material holder in which a cosmetic material is mounted, a rotary body to which a rotational force is applied from a user, an ascending/descending member configured to ascend or descend due to rotation of the rotary body to control exposure of the cosmetic material, an ascending/descending guide member to which the rotary body is rotatably coupled and which is configured to, during the rotation of the rotary body, prevent rotation of the ascending/descending member and guide vertical movement of the ascending/descending member, and a holder guide member which has a lower end disposed inside the rotary body and an upper end coupled to the cosmetic material holder and which is configured to support the cosmetic material holder, wherein the holder guide member is disposed to be independent of the rotation of the rotary body and prevents rotation of the cosmetic material holder and the cosmetic material during the rotation of the rotary body.
