Abstract (en)

The invention relates to a coupling member for discharging air from a displaceable airconditioning unit and/or a ventilation device, the coupling member comprising a housing comprising an air channel for guiding air, wherein the air channel extends between an inlet and an outlet, wherein the inlet is connectable with a displaceable airconditioning unit and/or a ventilation device, and wherein the outlet is substantially shaped as a letter throughput opening of a mailbox, and wherein the outlet is at least partially placeable in or through the letter throughput opening.
