Abstract (en)

A torque motor assembly includes a shell (22) which has a first wall and a second wall which defines a cavity (23). A torque motor (10/100) is positioned at least partially within the cavity. At least one compliant pad (28) is positioned between the first wall and the torque motor and is configured to trap at least one wire (14/114) within the shell. A housing (20) for a torque motor and a method of assembling a torque motor assembly are also disclosed.
