Abstract (en)
[origin: WO2019238148A1] A water pipe (1) comprises a housing (2) into which a receptacle (3), which has a suction connection and which can be filled with a liquid medium, and a heating chamber (4), which is connected to the receptacle via a suction hose (6), are integrated. The receptacle (3) and a housing part (7), which is located between the receptacle and the heating chamber (4) and accommodates an electronic unit, are detachably connected to one another. Furthermore, a valve (9) is mounted in the area where the mouth (8) of the suction hose (6) leads into the receptacle (3).
