Abstract (en)

[origin: WO2019239348A1] The present invention relates to the sector of leather manufacturing, mainly but not exclusively shoe manufacturing and relates to a process and apparatus for assembling a shoe or similar article, for example but not exclusively a so-called "pulling-over" or "lasting" machine, i.e. the machine in which the upper of a shoe is assembled on the form, under which the insole has previously been applied, in order to pull and glue the upper below the front part of the form.
