Abstract (en)

[origin: WO2019238492A1] The present invention relates to a cable marker strip (1) with one, in particular two, rows of cable markers which are arranged behind one another in a cable direction of extent, which cable marker strip (1) comprises a labelling track which has in each case one labelling surface for each cable marker, wherein in each case one fastening structure is provided for each cable marker on a fastening surface of the labelling track, which fastening surface lies opposite the labelling surface, which fastening structure has a connecting track and two holding limbs which are connected to the connecting track, lie opposite one another, and together delimit a cable receptacle, and wherein, starting from the connecting track, a spacing of the holding limbs from one another decreases in the region of the cable receptacle, with the result that the cable receptacle tapers. Furthermore, the present invention relates to a printer for printing the cable marker strip, and to a method for printing the cable marker strip by way of the printer. The printer can comprise a print head (71) which is arranged above pressure bars (811, 812) for the rows of cable markers.
