Abstract (en)

[origin: WO2019238920A2] The present invention relates to a device (10) for storing and transporting bulk material, in particular pharmaceutical bulk material, comprising a base container (12) and at least one connection body (14), which can be connected to the base container (12) in a releasable manner, wherein, when the base container (12) and the connection body (14) are connected, they form a sealing section (16), by means of which the base container (12) and the connection body (14) can be, or are, connected to one another in a gas-tight manner. The invention further relates for a method for filling a device of this kind with said bulk material and for emptying a device of this kind filled with bulk material, and to the use of a device of this kind for storing and transporting pharmaceutical bulk material.
