Abstract (en)  
[origin: WO2019239205A1] A multifunctional stackable container for optimized display and transport of fruit and vegetable products, said container comprising a unitary structure (2) composed of a substantially flat support base with a plurality of feet (4) extending therefrom. The base (3) has a central area (5) with a raised peripheral rim (6) for holding a plurality of transparent trays (V) for the products on display and has a plurality of openings (7) for facilitating air circulation in the trays (V) and visibility of the products arranged therein. The feet (4) face downwards and have a predetermined height (h) with lower appendages (8) adapted to removably fit into the rim (6) such that, upon stacking of multiple trays (1) a gap (9) is formed above the trays and side openings (14a, 14b) are formed in the structure (2) for optimized ventilation and three-dimensional visibility of the products.
