Abstract (en)
A water pipe including a water chamber that has a threaded top portion with a first opening into the water chamber, wherein the threaded top portion is configured to removably couple to a cap. The water pipe also includes a tube and a percolator disposed within the water chamber. A first end of the tube is coupled to a wall of the water chamber to form a second opening in the water chamber which extends into a first end of the tube, and a second end of the tube is coupled to the percolator.
