Abstract (en)
[origin: CN113446243A] The invention relates to a vacuum pump or a vacuum system comprising at least one vacuum pump. An inertial measurement unit is assigned to the vacuum pump, the inertial measurement unit comprises at least one inertial sensor, and the inertial sensor is designed to obtain a movement of the vacuum pump and/or an orientation of the vacuum pump, and provide measurement data relating thereto and/or provide information obtained by evaluating the measurement data.
