Abstract (en)

[origin: EP3809071A1] The present invention concerns a closing system (1) for refrigerators, comprising: at least one fixed frame (3) suited to be attached to the opening of a refrigerator (F) and defining an opening suited to allow access to the inner volume of said refrigerator (F); at least one door (5) associated with said fixed frame (3), said at least one door (5) being movable with respect to said fixed frame (3) between a closed configuration, in which said door (5) is closed on said fixed frame (3), and an open configuration, in which said door (5) is open on said fixed frame (3), said at least one door (5) comprising a door frame (7) and a panel (9) fixed to said door frame (7) and preferably made of a transparent material. According to the invention, said fixed frame (3) and said door frame (7) are made of high density polyurethane by means of moulding techniques.
