Abstract (en)
[origin: EP3809248A1] This application relates to the terminal field, and discloses an application icon displaying method and a terminal to resolve a problem that when a terminal includes a plurality of cloned applications of an application, application icons on a home screen of the terminal sharply increase, and consequently space of the home screen is occupied and a problem the applications have cloned applications is also exposed. A specific solution is applied to a terminal including at least two applications. The at least two applications include a first application and a cloned application of the first application. The terminal displays a first screen, where the first screen includes an icon of a first application, and an icon of the cloned application of the first application is hidden. The terminal receives a first operation performed by a user on the icon of the first application, and displays the hidden icon of the cloned application of the first application in response to the first operation, where the icon of the cloned application of the first application and the icon of the first application are simultaneously displayed on the first screen, and the first screen is included on a home screen of the terminal.
