Abstract (en)

[origin: WO2019243507A1] The present invention relates to a composition for dyeing keratin fibers, in particular human keratin fibers such as hair, comprising one or more oxidation dyes, one or more scleroglucan gums in a total weight content greater than or equal to 0.5 % relative to the total weight of the composition, and one or more associative polymers comprising at least one fatty chain having 8 to 30 carbon atoms, preferably non-ionic. The invention also relates to a method for dyeing keratin fibers using said composition and to a multi-compartment device suitable for implementing said composition according to the invention.
