Abstract (en)

[origin: WO2020217199A1] The invention relates to a device for removing at least one cooling element (2-2d) from an at least partially demoulded cast part (22), more particularly from a housing (22) for an electric motor cast from a light metal alloy (22), said device having a means (1; 1b) for removing the at least one cooling element (2-2d). The invention also relates to a method for removing at least one cooling element (2-2d) from an at least partially demoulded cast part (22), a method for introducing at least one cooling element (2-2d) into a mould core (26, 35) of a cast part mould (22), a cooling element (2-2d) and a cast part (22).
