Abstract (en)
[origin: WO2019243573A1] The invention concerns a vehicle for container transport, comprising a chassis (2) resting on partially steerable rolling means (3) and incorporating electrical or other motor means (4) acting on all or part of the rolling means (3) via appropriate drive means (5), said vehicle (1) also comprising at least control means (6) including means (7) for managing the operation of the motor means (4), means (8) for actuating the associated drive means (5), and steering control means (9) of the steerable rolling means (3). Advantageously, said control means (6) are incorporated in a control module (10; 10A) and the chassis (2) comprises, at at least one (11) of its ends, coupling receiving means (12) cooperating in a retractable manner with complementary receiving and coupling means (13) of said control module (10; 10A).
