Abstract (en)
[origin: WO2019243737A1] The invention relates to a method for producing a facing (P) comprising at least one first panel (91) and a second panel (92), each delimited by a front face (91a, 92a) and a rear face (91b, 92b) joined together by a side edge (91c, 92c), said method comprising at least the following steps: a) disposing a first panel (91), b) securing a first part (111) of a connector (100) to the first panel (91) in such a way that a second part (112) of said connector (100) protrudes from the first panel (91), and c) disposing a second panel (92) next to the first panel (91) and securing it to the second part (112) of the connector (100).
