Abstract (en)

[origin: WO2020002781A1] This teaching device involving computer hardware comprises a management processing system (1) connected to at least one execution unit (10) for executing applications intended for teaching a discipline for learners. A control console (70) is attached to this execution unit, for acting on the running of said application. A control unit (30) is provided to the educational teachers in order to monitor the behaviour of said learners. This device comprises a design unit (20) for designing said applications.
