Abstract (en)
[origin: EP3584863A1] The present invention relates to a polymer electrolyte comprising at least one organic solvent and at least one aromatic ionomer, wherein:- the organic solvent is a plasticizing solvent with a boiling point higher than 100°C and an electrochemical stability window of at least 2 V,- the aromatic ionomer comprises alternating ionic and nonionic segments; said aromatic ionomer comprising:• at least nonionic aromatic repeating units UAr1, and• at least one ionic repeating unit UI1 of formula (I).
