Abstract (en)

[origin: WO2020038552A1] The invention relates to a method for producing at least one transmitting and/or receiving antenna (2) for transmitting and/or receiving electromagnetic waves. Electrically conductive threads are incorporated as a transmitting and/or receiving antenna (2) into a textile carrier material (1) by means of a warp knitting machine or a Raschel machine. The invention further relates to a corresponding transmitting and/or receiving antenna (2).
