Abstract (en)

[origin: WO2019244090A1] The invention relates to a device designed in order to model hairpins so as to promote the insertion of winding sets of such hairpins on a stator or rotor so as to allow an increased filling of the slot space in the assembly of winding sets on such a stator or rotor. The application of this forming not only relates to electric stators or rotors, but to any device using electric wires having any gauge.
