Abstract (en)
[origin: WO2019243938A1] The aim of the invention is to provide a generic system with improved properties with respect to operating comfort. This is achieved in that a cooking system, in particular an induction cooking system, is provided, comprising at least one operator interface (12a-b) and at least one control unit (14a-b) which releases and/or blocks at least one cooking function for at least one placement unit (16a-b) depending on at least one identification characteristic input via the operator interface (12a-b) for the placement unit (16a-b), said placement unit being provided for placing on at least one cooking surface (18a-b) for the purposes of heating.
