Abstract (en)

[origin: CN112705504A] The invention relates to a high-pressure cleaner comprising a carrier support (10) and a housing part (20). A switch (11) is immovably fixed on the carrier support (10). The high-pressure cleaner (1) has at least two elements (12, 13), namely at least a second element (12) and a third element (13). The housing part (20) has a first opening (21) for the switch (11), a second opening (22) for the second element (12) and a third opening (23) for the third element (13). The second element (12) and the third element (13) are immovably arranged on a common carrier (30). The carrier (30) is arranged between the carrier support (10) and the housing part (20). The high-pressure cleaner (1) has a positioning device (40) for positioning the carrier (30) relative to the switch (11).
