Abstract (en)

[origin: EP3812573A1] A fuel rail assembly for a fuel injection system for an internal combustion engine, has a fuel rail (2) comprising an elongate tubular body having an internal volume comprising a reservoir for fuel, the fuel rail having an inlet port through which fuel is supplied to the reservoir. The fuel rail body is formed of a mouldable material. The fuel rail has at least one port (4) having a reinforcing tube (6).
