Abstract (en)

[origin: WO2020001958A1] A runner (3) for drawer elements, in particular drawers or trays, that are movable relative to a carcass (2) of a piece of furniture (1) or a household appliance, has: a carcass rail (31) that can be secured directly or via a carcass bracket to a carcass (2) of the piece of furniture (1) or the household appliance; a running rail (32) that can be secured to the movable drawer element; and electric conductors for transmitting electrical energy to a power consumer positioned on the movable drawer element, wherein positioned on the carcass rail (31) or the carcass bracket is a printed circuit board (43) extending over the length of the carcass rail (31), and positioned on the running rail (32) is a contact apparatus (5) that has at least one electrically conductive contact element (53) which, when mounted, makes permanent electrical contact with the printed circuit board (43), and has a connecting element (8) that is electrically connected to the contact element (53) for connecting to the movable drawer element. The invention also relates to a piece of furniture or a household appliance.
