Abstract (en)

[origin: WO2020002049A1] The invention relates to a sanding block (10) for manual use, in particular for manually sanding surfaces, having at least one base plate (12) for holding an abrasive article (14) and at least one sanding block body (18) having a gripping region (20). According to the invention, a rechargeable-battery operated device (22) for removing sanding dust by suction is integrated in the sanding block (10), said device comprising at least a dust box (28), a motor housing (30), in which a drive motor (34) provided with an impeller (32) is provided, and a rechargeable battery (26) for supplying the drive motor (34) with power without an external power supply.
