Abstract (en)
[origin: EP3817056A1] A display device is provided. The display device comprises a first pixel stem wiring and a common stem wiring extending in a first direction and spaced apart from each other, a first pixel branch wiring branched from the first pixel stem wiring and extending in a second direction intersecting the first direction, at least one common branch wiring branched from the common stem wiring and extending in the second direction and at least one first light emitting element disposed between the first pixel branch wiring and the common branch wiring, wherein the first pixel branch wiring includes a base branch pattern connected to the first pixel stem wiring, a separate branch pattern spaced apart from the base branch pattern, and a bridge wiring connecting the base branch pattern to the separate branch pattern.
