Abstract (en)
[origin: WO2020009716A1] A gem applicator assembly including a dispenser supporting a plurality of gems and an applicator. Each gem has an adhesive backing. The applicator includes a body with a support assembly supported by the body and configured to receive and support the dispenser with one of the gems alignable with an application target area. A plunger is supported relative to the body and movable relative thereto between an initial position and an application position wherein the push rod engages the aligned gem and pushes the gem such that the adhesive backing of an aligned gem moves toward the application target area. The gem dispenser may include a disk configuration with a plurality of spaced apart gem openings extending through the disk. Each gem is aligned with a respective gem opening.
