Abstract (en)  
[origin: US2021139191A1] The present disclosure provides an orienting assembly for orienting one or more beverage containers stored within a secondary package. The orienting assembly includes a base portion having a plurality of container regions and remaining non-container regions. The orienting assembly further a layer of a predetermined material, at least partially, coated onto one or more of the plurality of the container regions such that a coefficient of friction at the coated container region is higher compared to that of non-container regions.
