Abstract (en)

[origin: WO2020008004A1] The invention relates to a three-dimensional measuring device, comprising an arm having a free end provided with an interface body (100) which includes a front face arranged to form a fixing plate alternately for a first gripping member (200) and a second measuring member (400), a tubular coupling member (110) for coupling to a first measuring member (500) by contact projecting from said front face; and a side surface arranged to form a second fixing plate for a second gripping member (300).
