Abstract (en)
Provided is a protective garment that ensures facilitated doffing. A protective garment 10 according to one embodiment includes an upper part 12 of the garment, a lower part 14 of the garment, and an open/close portion 24. The upper part 12 of the garment includes a body portion 16, a pair of sleeve portions 18a, 18b, and a hood portion 20. The lower part 14 of the garment is connected to the upper part of garment. The open/close portion 24 is formed in a front body portion 16a of the body portion for donning and doffing the protective garment. A stretchable portion 32 is formed in a boundary between a back body portion of the body portion and the hood portion.
