Abstract (en)

[origin: WO2021089627A1] The invention relates to a ground removal device and a method for producing a hole in the ground by means of a removal tool, which is designed and can be driven for the removal of ground material. According to the invention, at least one image-capturing unit is arranged on the removal tool, which is designed for creating an image of the upcoming ground when introducing the removal tool into the ground and removing ground material.
