Abstract (en)  
The present disclosure provides a toilet flushing system (2), comprising a water tank (21), a pressure pump (22), a water inlet pipe (23) and a water flushing pipe (24); the water inlet pipe (23) is connected to a water inlet (211) of the water tank (21), a connection position between the water inlet pipe (23) and the water inlet (211) of the water tank (21) is disposed with an open air suction port (212); and a water outlet of the water tank (21) is connected to the water flushing pipe (24) through the pressure pump (22). The toilet flushing system (2) with the water tank (21) can achieve a better vacuum breaking effect and effectively avoid a backflow of water in the water tank. The present disclosure further provides a toilet, which comprises the toilet flushing system.
