Abstract (en)

[origin: WO2020012509A1] The present invention relates to a method and a device for treating and/or transporting food items. The apparatus and method are designed to facilitate treating food items in liquid. The device of the present invention is designed as a spiral pump with a tubing that is wound around a frame structure which rotates around a horizontal axis. The apparatus of the present invention and the use thereof provides a method to treat food items in a spiral pump, where the food items are treated cycle by cycle in the pump.
