Abstract (en)

[origin: WO2020011836A1] Disclosed is a drive system (1) driving a screen (6), comprising an actuator (3) for rotationally driving a winding shaft (5) associated with the screen (6), and a compensation spring (7). The compensation spring (7) comprises a first series of turns (70) having a first spacing (E70) and at least one second series of turns (72) having a second spacing (E72), the value of which is greater than the value of the first spacing (E70).
