Abstract (en)

[origin: WO2020048699A1] The invention relates to a device (1) for removing and/or installing an annular component (2), which is arranged at a position within a turbine housing, which position is accessible via an access point (5) of the turbine housing (3). The invention further relates to a method for removing and to a method for installing a component (2) of this type by means of a device (1) of this type.
