Abstract (en)

[origin: WO2020011398A1] The invention relates to a heat exchanger (10) comprising at least one temperature equalization element (22). The at least one temperature equalization element (22) has a casing (28), which forms a cavity (20), and a phase change element (18), the phase change element (18) being situated in the cavity (20) and being in thermal contact with the casing (28). The invention also relates to a method for producing a heat exchanger (10).
