Abstract (en)
It is an object of the invention to increase the ion output in haircare devices. According to one aspect the invention is a haircare device. The haircare device comprises an air inlet, an air outlet, an air channel in between the air inlet and the air outlet, an ionizer configured for ionizing air and a fan configured for moving the air from the air inlet to the air outlet and along the ionizer. The air outlet and / or the air channel comprises a conductive additive in order to improve the ion output to the hair when the haircare device is in use.
