Abstract (en)
[origin: EP3822029A1] There is provided a fastening tool for affixing a fastener to a structure including a housing, having a first longitudinal axis, a handle connected to said housing and extending substantially perpendicular to said first longitudinal axis, and a magazine carrier arm, extending from a proximal end portion, connected to said housing, to a distal end portion along a second longitudinal axis substantially perpendicular to said first longitudinal axis, configured to retainingly receive a magazine, wherein said magazine carrier arm comprises at least one latch mechanism provided at said distal end portion and adapted to couplingly engage with a catch member of the magazine so as to fixingly bias said magazine towards said housing along said second longitudinal axis, during use.
