Abstract (en)

[origin: EP3822441A1] Safety guide kit for sliding doors (11), which comprises a first profile (1) with a plurality of wheels and a second profile (2) which comprises at least two surfaces configured for housing and enabling the longitudinal movement of said wheels, such that the first profile (1) is configured for engaging with the second profile (2) and for moving longitudinally, once engaged, a certain length with respect to said second profile (2). In the same way, the second profile (2) comprises an intermediate section (26), bent at 90 degrees, which comprises a third horizontal surface (261), located on an internal side of the second profile (2) and a fourth vertical surface (262), continuous and perpendicular to the third surface (261), located on the internal side of the second profile (2) wherein the third surface (261) and the fourth surface (262) are configured for setting and rigidly fixing to a rebate (27) of the sliding door (11).
