Abstract (en)

Household appliance (1) comprising; a cooling appliance comprising; a body, a first shelf (1), a second shelf (2) configured to be hanged underneath the first shelf (1) via a first link (3) and a second link (4) between a first orientation during which the second shelf (2) extends almost adjacent to the first shelf (1) and a second orientation during which the second shelf (2) is distanced apart from the first shelf (1) so as to store articles thereon, wherein the first link (3) comprises a channel (5) accommodating a front end (6) of the second shelf (2). A primary holding means (7) inside the channel (5) is configured to releasably and pivotably hold the front end (6) in between itself and the first link (3).
