Abstract (en)

[origin: WO2020015965A1] The invention relates to a marine transmission (1) having a main drive shaft (3), having a first intermediate shaft (4) and having an output shaft (6) via which at least one propeller (21) can be driven. The marine transmission (1) furthermore comprises an electric machine (7) as additional drive, a second intermediate shaft (5) and a planetary transmission (8), the electric machine (7) being connectable via the planetary transmission (8) to the second intermediate shaft (5) of the marine transmission (1). The invention furthermore comprises a drive arrangement for a marine drive having a main drive engine (2) and having a marine transmission (1) of said type.
