Abstract (en)

[origin: WO2020160894A1] The invention relates to a sealing sleeve (12) for arrangement between a mounting body (4) of a shut-off flap valve (2) and a flap (6) which is rotatable with respect to the mounting body (4) and limits a flow of a process fluid, the sealing sleeve (12) comprising a sensor arrangement (30), and the sensor arrangement (30) being configured to provide at least one signal (S) which characterises a tightness of the shut-off flap valve (2) with respect to internal or external leakage.
