Abstract (en)
An item of jewelry, which comprises at least one substantially annular body (2), which is substantially arranged along an ideal axis (A) having an annular extension. The body (2) is substantially constituted by at least three mutually complementary elements (3a, 3b, 3c); a first element (3a) and a second element (3b), which are substantially aligned along the ideal axis (A) of the body (2), are mutually detachably coupled by way of first retention means (4); a third element (3c), which is externally at least partially superimposed on either or both of the first element (3a) and the second element (3b), is coupled detachably to either or both of the first element (3a) and the second element (3b) by way of second retention means (5).
